I ran the following from the admin powershell prompt:

```
choco upgrade metasploit-flare -f
```

Below is the output from that command, including the errors about the file not being found.

Upgrading the following packages:
metasploit.flare
By upgrading you accept licenses for the packages.

You have metasploit.flare v5.0.42.20190815 installed. Version 5.0.43.20190826 is available based on your source(s).

I am running into the same issue with a brand new install. see below:

Vm is running windows 10, in vmware workstation 15, if that helps at all.

Can confirm, this is happening on a build I performed today, in addition to taskbar items not appearing as they should.
